

Wireless Charger

Wireless • Safe • Intelligence

A compact and reliable Qi v1.3.2 certified module, the SAYKAL Wireless Charger enables up to 15W fast charging through a high-efficiency wireless interface powered by 12-24V DC input. Its LED status indication provides instant visual feedback, while advanced protection features guard against over-current, over-temperature, and foreign objects. Designed for vehicle interiors and e-mobility platforms, it ensures safe, convenient, and cable-free power delivery in motion.
